MedCore

Cagayan State University

AN AI-POWERED PLATFORM FOR TRANSPARENT HOSPITAL BILLING AND INSURANCE RECONCILIATION

Provide the Best Care. Reconcile the Bill. Minimize Out of Pocket Expenses.

- Governance in HealthCare
- Transparent Billing
- Billing Reconciliation

Our Lived Healthcare Patient Experience

Before MedCore became a concept, we experienced the problem ourselves.

01

02

03

04

We did not imagine this problem. We experienced it.

1. Coordinate with HMO
2. See the Specialist
3. Get Recommendation
4. Undergo Procedure
5. Process Documentation
6. Pay & Discharge

PhilHealth
39 years +
Private HMO

₱36,500
Quoted Bill

₱8,300
Out of Pocket Payment

A bill is only transparent when the patient understands what they are actually paying for.

MedCore

Problem Statement

Our experience uncovered a deeper disconnect between hospital billing and insurance coverage.

The PhileHealth and HMO benefits exist.
The complete bill is still difficult to decipher and trust.

Discharge depends on reconciling hospital charges, Senior/PWD discounts, PhilaHealth rates, and HMO approvals into one ledger; any error delays release for hours.

THE FINANCIAL IMPACT

₱615B/yr

Household Out-of-Pocket (OOP) healthcare expenditure (PSA, 2024)

42.7% of all national health spending is shouldered directly by Filipino families.

Philippine Statistics Authority (PSA), 2024 Philippine National Health Accounts..

THE ACCESS GAP

20%

of claims are returned or denied by PhilHealth due to **CLERICAL & PROGRAM ERRORS.**

PHAPi (2023–2024); locks up ₱4B to ₱10B in trapped hospital liquidity and delays patient clear

01

Unclear Patient Financial Responsibility

Patients struggle to understand hospital charges, insurance coverage, and balances.

02

Disconnected Insurance & Hospital Data

Separate billing & insurance systems slow reconciliation and increase errors.

03

Billing Disputes & Transparency Concerns

Patients lack clarity on coverage, costs, and billing reasons, causing confusion, disputes, & payment delay.

MedCore

Proposed Solution

One closed loop transforms billing and insurance reconciliation into actionable insight.

Ingest → Reconcile → Clarify → Settle → Accelerate

1

Ingest

Capture hospital charges, pharmacy requisitions, and bedside orders in real time from legacy databases non-invasively.

2

Reconcile

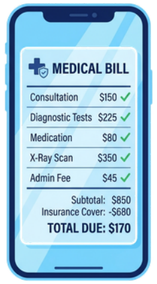

Automatically compute the statutory deduction cascade: 12% VAT exemption, 20% SC/PWD discount, PhilHealth ACR, and HMO caps.

3

Clarify

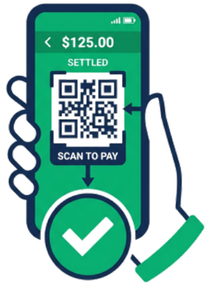

Send a plain-language SMS magic link to the patient's phone with a transparent ledger detailing covered and excluded items.

4

Settle

Enable instant digital checkout via QR Ph, GCash, Maya, cards, or structured digital promissory notes compliant with RA 9439.

5

Accelerate

Automatically dispatch a scannable digital discharge gate pass upon payment, freeing up hospital beds in under 45 minutes.

Continuous intra-care reconciliation eliminates the end-of-stay administrative standoff.

Not just a billing app: one closed financial loop connecting patient transparency to hospital bed turnover.

Impact & Expected Benefits

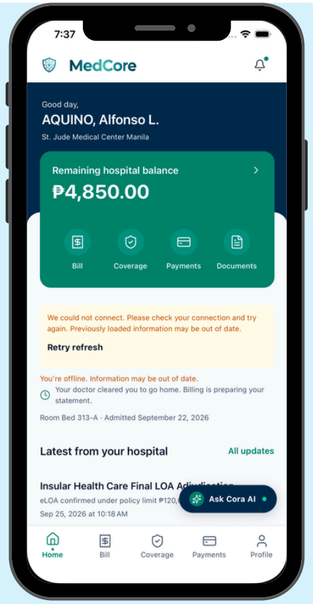

One closed loop transforms billing and insurance reconciliation into actionable insight.

PhilHealth and HMO Holders

How much do I actually owe, what did my insurance cover, and why?

Real-time itemized bill, plain-language medical terms, guaranteed senior/PWD discounts, and 1-click GCash/QR Ph checkout.

- **Discharge velocity**
- **Bill transparency**
- **Zero bill shock**

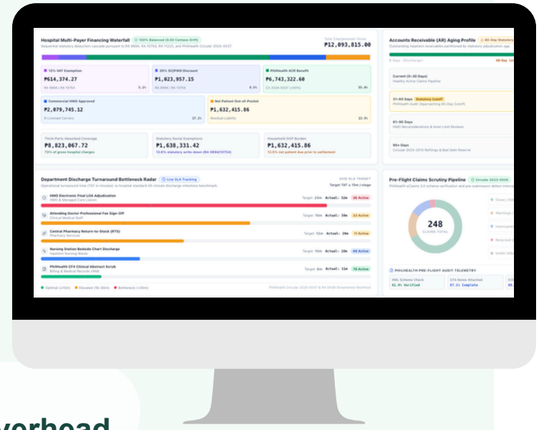

HealthCare Administrators

Where do billing bottlenecks occur, and how do we speed up bed turnover?

Centralized inpatient ledger, pre-discharge eClaims 3.0 XML validation, SMS-based doctor fee tracking, and instant digital gate-pass clearance.

- **Bed turnover & discharge turn around**
- **Clean claims (<2% RTH)**
- **40% less clerical overhead**
