MedCore

Clear the Way for Care

Prototype Video Script — Scenes for Coach Review

3–5 min • Hopeful-inspirational, all English • No actors — team near ending only

Suggested VO may be rewritten freely. Only Must-keep lines + facts are fixed.

TEAM
Marc Andre Nicolas M. Callueng — Student
McLein Jei G. Onza — Student
Micoh Jeremy C. Montenegro — Student
Prof. Fernando M. Jaminola Jr., MIT — Coach

Traction: DTI Youth Entrepreneurship Program "Be Your Own Boss" — Best Pitch (Pitch Perfect)

Scene 1 — HOOK (~10–20s)

PURPOSE
Say what MedCore is in one breath so viewers stay.

SUGGESTED SCRIPT — REWRITE FREELY

[VO, warm, unhurried] "MedCore clears the hospital money maze — so families walk out in minutes, not hours. Discharge in under 45 minutes. Not eight hours."

MUST-KEEP (FIXED)
Product name + under 45 minutes, not 8 hours.

VISUAL — PICK ANY

- A: Macro ticking clock + blurred bill marked SAMPLE, slow push-in
- B: Clean navy title card + ledger flashing green
- C: Sunrise hospital exterior stock !' title

Editor freedom: Cut to 10s if needed. Never place team here. Music full then duck under VO. ---

---

Scene 2 — PROBLEM WITH EMOTION (~30–50s)

PURPOSE
Make judges care. True stories, gently told, no actors crying.

SUGGESTED SCRIPT — REWRITE FREELY

[VO, softer] "A senior citizen who is a PhilHealth member for 39 years, with a private HMO. Admitted for a 38,000-peso out patient operation — and was quoted 8,300 pesos out-of-pocket expense which was unsettling and unexpected. Because, his original expectation was Philhealth and the private HMO should have handled 90% of his hospital fees. The pain of producing that out-of-pocket amount is excruciating. It was only adjusted because he knew the hospital administrator of the private hospital who summoned his hospital finance staff to advise Philhealth to reduce it to a minimum amount of 1,300.

VISUAL — PICK ANY

- A: Hands holding papers, paper stack growing
- B: Phone "on hold with HMO 2:14:33" screen
- C: Blurred lobby B-roll + kinetic text revealing amounts

Editor freedom: Shorten to one case if running long. Add 2s silence before Scene 3. No faces, no real data. ---

Scene 3 — SOLUTION PROMISE (~20–30s)

PURPOSE
Relief. Frame MedCore before showing it.

SUGGESTED SCRIPT — REWRITE FREELY
[VO, lifting] "MedCore doesn't replace your hospital system. It finishes the work — unifying the hospital bill, PhilHealth case rates, and HMO rules into one real-time, explainable ledger. Guide, verify, reward, report, improve — all the way to a QR pass to walk out with dignity."

MUST-KEEP (FIXED)
Not a replacement — reconciliation layer on top of BizBox / Comlogik / Medsys + GUIDE !' VERIFY !' REWARD !' REPORT !' IMPROVE + ClaimReady.

VISUAL — PICK ANY
- A: Website hero scroll into ledger waterfall ±84,320 !' ±5,500
- B: Daylight window cut + 6-dot progress MGH !' Cleared turning green
- C: Hands opening door to light over ledger

Editor freedom: Keep jargon out or translate it immediately. Brighten color grade from here on. ---

Scene 4 — FEATURE DEMO, PART 1: GUIDE + VERIFY (~40–60s)

PURPOSE
Show early features working live. Screens carry it.

SUGGESTED SCRIPT — REWRITE FREELY
[VO, confident] "It starts on admission. GUIDE shows the estimate before the bill exists — room-tier checked, no-deposit rules respected. A semi-private at 5,500, not a surprise 18,200 in private.

Then VERIFY. PhilHealth eligibility and HMO eLOA in seconds — not hours of phone tag. Exclusions flagged in plain words, while there's still time to act."

MUST-KEEP (FIXED)
eLOA in seconds vs 2–4 hr calls + show estimator + CoverageApprovalsPage PEC ' eLOA ' .

VISUAL — PICK ANY
- A: Screen-record estimator card + tier bars, cursor highlighting
- B: Screen-record coverage page clicking to Approved + hands on laptop cutaway
- C: Phone + laptop side-by-side, 150% zoom

Editor freedom: Use live `med-core1.vercel.app` only, `SAMPLE DATA` watermark. Zoom callouts OK. Cut whichever feature drags. ---

Scene 5 — FEATURE DEMO, PART 2: REWARD + REPORT + CLAIMREADY (~60–80s, hero proof)

PURPOSE
Payoff — money moves, beds turn over, claims don't bounce.

SUGGESTED SCRIPT — REWRITE FREELY
[VO] "When it's time to leave — REWARD. One tap on GCash, Maya, QR Ph — or a legal e-promise instead of being held. A QR pass plus PIN, and the bed turns over.

Behind it, REPORT watches every countdown — days waiting cut from 75 to 21, collections up 40 percent.

And ClaimReady scrubs every eSOA before it bounces — returns from 20 percent to under two. Every denial becomes a rule, so it never happens twice."

MUST-KEEP (FIXED)

QR + PIN cleared + DAR 75d !’ 21.4d / POS +40% + RTH 20% !’ <2% (1.2%) + lower-third throughout: LIVE PROTOTYPE — med-core1.vercel.app. Tech note (say once or card): Hono + Postgres, single source of truth.

VISUAL — PICK ANY

- A: DischargeClearancePage !’ cleared badge + phone tap (hands only) + chime
- B: CommandCenterPage + RcmAnalyticsPage countdown ticking
- C: ClaimsEsoaPage + DisputesExceptionsPage red !’ green 1.2%

Editor freedom: This is the longest block — trim REPORT first if over time. Keep clicks/keyboard faintly audible for authenticity. Local dev fallback if wifi fails. ---

Scene 6 — MARKET + COMPETITORS, QUICK (~20–30s)

PURPOSE

Context only — don't steal time from features.

SUGGESTED SCRIPT — REWRITE FREELY

[VO, steady] "Built for CFOs, clerks, doctors, and the mother paying from her phone. Starting where it's ready — NCR, Calabarzon, Cebu, Cagayan Valley. A 4.564-billion total, 2.738-billion ready now across 454 hospitals.

Hospitals already run BizBox or Comlogik for care — excellent systems, just not built for three-way money. Today teams bridge it manually. MedCore sits on top and finishes that handshake."

MUST-KEEP (FIXED)

TAM ±4.564B (1,260) !’ SAM ±2.738B (454) !’ SOM ~ ±1.35B on one card (hold 5s) + middleware, no rip-and-replace.

VISUAL — PICK ANY

- A: Icon montage (no faces) + PH map dots + bar growing
- B: Simple 2-column table: HIS ' care / ' reconciliation vs MedCore layer

Editor freedom: Cut pricing entirely. Text names only for competitors. ---

Scene 7 — TEAM NEAR ENDING (~20–30s, first faces in video)

PURPOSE

Trust. Real people behind live product.

SUGGESTED SCRIPT — REWRITE FREELY

[On camera, natural] "We're MedCore — Marc Andre Nicolas M. Callueng, McLein Jei G. Onza, Micoh Jeremy C. Montenegro, guided by Professor Fernando M. Jaminola Jr. Students building for Filipino families."

VISUAL — PICK ANY

- A: Team medium shot daylight hallway, slow push-in
- B: Same + hands-on-laptop cutaway

Editor freedom: One speaker or each saying own name — pick warmest of 3 takes. Eye-level phone, window side-light. Don't move this earlier. ---

Scene 8 — TRACTION + CLOSE (~15–25s)

PURPOSE

End on light + proof.

SUGGESTED SCRIPT — REWRITE FREELY

[VO, proud, then quiet] "Recognized with Best Pitch at DTI's Be Your Own Boss Youth Entrepreneurship Program — now pilot-ready for Cagayan Valley. Ward-level in weeks, measured on

discharge time, not logins. Reclaim beds. Recover cash. Release patients with dignity."

MUST-KEEP (FIXED)

DTI Be Your Own Boss — Best Pitch (Pitch Perfect) + Cagayan Valley pilot-ready + end card med-core1.vercel.app held 4s.

VISUAL — PICK ANY

- A: Holding printed award !’ empty clean bed !’ door to daylight !’ navy end card
- B: Award close-up on seal !’ window light !’ end card

Editor freedom: If award is digital, print it — holds better. Let music resolve fully. End on URL, not stats. ---
